On behalf of the entire team of editors, it is my pleasure to recognize outstanding reviewers for *Inorganic Chemistry* as the American Chemical Society joins other publishers and organizations that help make scientific publishing possible in celebrating Peer Review Week September 21–25. We thank the more than 4300 people from 31 countries who provided nearly 9800 reviews during the last year (August 25, 2019, to August 24, 2020). Their comments and advice have been crucial in improving the quality of submitted manuscripts, and we are deeply grateful for their efforts to enhance the communication of our science.

We list here 71 reviewers who have made especially notable contributions during the last year. They were chosen on the basis of their many timely, constructive, and substantive reviews that have helped maintain *Inorganic Chemistry* as the top journal in the field. They hail from institutions around the globe and bring wide-ranging expertise to their work across the full scope of the field.

With gratitude and appreciation for their efforts and insights, we honor the following individuals for their outstanding efforts as reviewers (listed in alphabetical order):

- Roger Alberto**, Universitat Zurich, Switzerland
- Thomas Albrecht-Schönzart**, Florida State University, United States
- Reiner Anwander**, Eberhard Karls Universität Tübingen, Germany
- Yusuke Asakura**, Tohoku University, Japan
- Mihail Atanasov**, Max-Planck-Institut für chemische Energiekonversion, Germany
- Louise Berben**, University of California—Davis, United States
- Holger Braunschweig**, Julius-Maximilians-Universität Würzburg, Germany
- Xian-He Bu**, Nankai University, China
- Jean-Claude Bunzli**, Ecole Polytechnique Fédérale de Lausanne College du Management de la Technologie, Switzerland
- Robert Cava**, Princeton University, United States
- Tristram Chivers**, University of Calgary, Canada
- Jack Clegg**, The University of Queensland, Australia
- Peter Comba**, Ruprecht Karls Universität Heidelberg, Germany
- Miquel Costas**, Universitat de Girona, Spain
- Robert Crabtree**, Yale University, United States
- Samar Das**, University of Hyderabad, India
- Bas de Bruin**, University of Amsterdam Van't Hoff Institute for Molecular Sciences, The Netherlands
- Sam de Visser**, University of Manchester, United Kingdom of Great Britain and Northern Ireland

Abhishek Dey, Indian Association for the Cultivation of Science, India

- Linda Doerrer**, Boston University, United States
- Yu-Bin Dong**, Shandong Normal University, China
- Clement Falaise**, Institut Lavoisier de Versailles, France
- Skye Fortier**, University of Texas at El Paso, United States
- Daniel Fredrickson**, University of Wisconsin—Madison, United States
- Kamran Ghiassi**, Air Force Research Laboratory, United States
- Malcolm Halcrow**, University of Leeds, United Kingdom of Great Britain and Northern Ireland
- Zhengbo Han**, Liaoning University, China
- Yasuchika Hasegawa**, Hokkaido University, Japan
- Trevor Hayton**, University of California—Santa Barbara, United States
- Michael Hayward**, University of Oxford, United Kingdom of Great Britain and Northern Ireland
- Xiao-Ying Huang**, State Key Laboratory of Structural Chemistry, China
- Shigeyoshi Inoue**, Technische Universität München Fakultät für Chemie, Germany
- Timothy Jackson**, University of Kansas, United States
- Oliver Janka**, Universität des Saarlandes, Germany
- Atsushi Kobayashi**, Hokkaido University, Japan
- Kirill Kovnir**, Iowa State University, United States
- Subrata Kundu**, Central Electrochemical Research Institute, India
- Ya-Qian Lan**, Nanjing Normal University, China
- Nicolai Lehnert**, University of Michigan, United States
- Crispin Lichtenberg**, Julius-Maximilians-Universität Würzburg Fakultät für Chemie und Pharmazie, Germany
- Jiang-Gao Mao**, Chinese Academy of Sciences Fujian Institute of Research on the Structure of Matter, China
- Marinella Mazzanti**, Ecole Polytechnique Fédérale de Lausanne, Switzerland
- David Mills**, University of Manchester, United Kingdom of Great Britain and Northern Ireland
- Michael Neidig**, University of Rochester, United States
- Koichi Nozaki**, University of Toyama, Japan
- Mei Pan**, Sun Yat-Sen University, China
